

# Introduction

Introduction nord 4 is an emblematic pod system kit with versatile capabilities, which can give full play to the performance and advantages of the entire device. It has a built-in 2000mAh battery, enough to provide a maximum power of 80 watts. The kit comes with two 4.5ml nord 4 pods, one with an RPM 2 mesh coil and the other with an RPM mesh coil. Besides, two air-inlet rings are cleverly designed on the top of the device for free adjustment of air intake. We build this legend for you, and you make it yours. Innovation keeps changing the vaping experience. The Kit Includes

- 1 x nord 4 RPM 2 Pod (RPM 2 Mesh 0.16Ω Coil Preinstalled) (4 5ml) 1 x nord 4 RPM Pod (RPM Mesh 0.4Ω Coil Preinstalled) (4.5ml)
- 1 x User Manual
- **Specifications**

### Product Category: Electronic Cigarette Size: 33.7\* 24.4\* 104.9mm

Weight: 115g Output Wattage: 5W-80W Battery Capacity: 2000mAh Standby Current: < 50uA Input Voltage: 3.3V-4.2V Output Voltage: 0.5V-4.0VResistance Range:  $0.15\Omega-2.50\Omega$ Charging Voltage: 5V±0.2V Charging Current: 1.1A (Max) Overcharge Voltage: 4.3V±0.05V Overdischarge Voltage: 2.4V±0.05V

Overcharge Current: 2A±0.6A Verification

Note: Please carefully keep the AB verification codes on the package. AB verification codes are required and will

be used in product verification and after-sales service 1. Please download and install IVPS Tour APP.

# Components

## nord 4 Device 1. Power On:

## While the device is off, quickly press the Power Button 5 times in

## 2 seconds to turn it on. The screen displays "SMOK" and enters the main interface.

(1) While the device is on, press the Power Button to vap (2) When vaping, the vaping time interface I S B CONTROL S I S CONTROL S

# vaping for 0.5 seconds, it will automatically return to the main

3. Wattage Setting: Press UP/DOWN button to adjust the power level between 5W-80W.

3) Press the Power Button 3 times to lock or unlock the vaping

The number of puffs will be automatically cleared when it reaches

## When the USB cable is inserted, the charging interface will be displayed with battery percentage and estimated charging

5. Charging:

6. Power Off: While the device is on, quickly press the Power Button 5 times in

# 2 seconds to turn it off. The screen displays "GOODBYE"

nord 4 Pod

English / 04

# The specific explanations are shown as below: Prompt & LED Light BATTERY LOW (White LED flashes 15 times)

GOODBYE (White LED flashes 3 times)	The battery voltage is lower than 3.0V±0.1V. (Please charge the device to activate the system after low battery shutdown)
OHMS TOO LOW (White LED flashes 4 times)	Watt mode: the atomizer resistance is lower than 0.15 $\Omega\pm5\%$
OHMS TOO HIGH (White LED flashes 4 times)	Watt mode: the atomizer resistance is higher than 2.50 $\Omega$ ±5%
NO ATOMIZER (White LED flashes 4 times)	Atomizer hasn't been detected.
ATOMIZER SHORT (White LED flashes 5 times)	Short circuit has been detected.
TIME OVER (White LED flashes 5 times)	The vaping time is longer than 8 seconds.
РСВА ТОО НОТ	The temperature of PCBA is too high, and high-temperature protection starts.
POWER LOCK	The vaping function is locked (you can't fire it when locked).
POWER UNLOCK	The vaping function is unlocked.
